

☁️ FixMaadi 24/7 Cloud Deployment Guide (Zero-Laptop Running)

Follow these simple 3 steps to take FixMaadi 100% live on **Render.com** (100% Free Tier). Once deployed, **you and Bhuvan Nara can access the live portal from any laptop or mobile phone anywhere in the world 24/7/365**, even when your laptop is completely powered off!

⚡ Step 1: Create a Free GitHub Repository & Push Code (1 Minute)

Open your terminal in `/scratch/fixmaadi-bot` and run:

```
git remote add origin https://github.com/YOUR_GITHUB_USERNAME/fixmaadi-bot.git
git branch -M main
git push -u origin main
```

(If you don't have a GitHub repository created yet, go to github.com/new, create a private/public repo named `fixmaadi-bot`, and paste the commands above).

⚡ Step 2: Deploy on Render.com (100% Free - 1 Minute)

1. Go to <https://dashboard.render.com> and log in with GitHub.
 2. Click **New +** -> Select **Web Service**.
 3. Select your `fixmaadi-bot` GitHub repository.
 4. Render will automatically detect the `Dockerfile` and `render.yaml` configuration in the codebase!
 5. Select:
 - **Name:** `fixmaadi-bagalkot`
 - **Region:** `Singapore (Asia Pacific)`
 - **Plan:** `Free ($0/month)`
 6. Click **Deploy Web Service!**
-

Step 3: Global Permanent Access Link

Render will instantly build your service and provide a permanent, secure, 24/7 HTTPS

domain: 🖱️ <https://fixmaadi-bagalkot.onrender.com>

- **Both you and Bhuvan Nara can bookmark this link on your phones and laptops.**
- **All 70+ Virtual AI Employees & Daemons run 24/7 continuously on Render cloud servers.**
- **Your laptop can be turned off, closed, or offline — FixMaadi never stops!**
