

Setting Up Direct Inbox Email Delivery for Daily 6 AM & 8 PM Reports

Why the Test Email Logged to Server Payload

When you clicked " **Trigger Test Mail Digest Now**", the system generated the full structured report payload for `vinodachere@gmail.com` and logged it cleanly to the server console.

To send physical outbound emails directly over the internet into your Gmail Inbox (`vinodachere@gmail.com`), an outbound SMTP relay or Gmail App Password is required.

Option A: Connect Gmail App Password (100% Free, 2 Minutes)

1. Go to your Google Account -> **Security** -> **2-Step Verification**.
2. Scroll to bottom -> **App Passwords**.
3. Create a new App Password named "**FixMaadi Digest**" -> Copy the 16-character password (e.g., `abcd efgh ijkl mnop`).
4. Set environment variables in `.env` :

```
SMTP_HOST=smtp.gmail.com
SMTP_PORT=587
SMTP_USER=vinodachere@gmail.com
SMTP_PASS=abcdefghijklmnop
EMAIL_TO=vinodachere@gmail.com
```

Option B: Connect Free SendGrid API (100 Free Emails / Day)

1. Create a free account at <https://sendgrid.com>.
2. Generate an API Key with `Mail Send` permissions.
3. Set environment variable:

```
SENDGRID_API_KEY=SG.your_api_key_here  
EMAIL_TO=vinodachere@gmail.com
```

🎉 Once configured, both the **06:00 AM Morning Plan** and **08:00 PM Evening Performance Report** will land directly in `vinodachere@gmail.com` every single day!
