

FixMaadi Instagram Account Setup & Automated Engine Guide

Why Instagram Account Creation Requires 60-Second Setup on Your Phone

Meta (Instagram) uses strict **bot-detection**, **CAPTCHA puzzles**, and **SMS OTP verification** during the creation of brand-new accounts. Automated headless AI scripts cannot bypass Meta's SMS verification without a real phone number.

Once you take **60 seconds to create the account on your phone/browser**, our automated AI engine script (`instagram_publisher.js`) takes over 100% 24/7 autonomous posting!

60-Second Account Creation Details

1. Open Instagram App on your phone or go to <https://instagram.com>.
2. Click **Sign Up** using your email: `vinodachere@gmail.com`
3. Set Username: `fixmaadi_bagalkot`
4. Set a strong password of your own choosing and store it in a password manager (never in this repo)
5. Set Profile Name: `FixMaadi Bagalkot | 0% Commission Home Services`
6. Copy & Paste this Bio:

100% Autonomous AI Posting Loop

Once created, our background Marketing Engine (**Ananya Rao – FM-EMP-301**) continuously executes:

- **08:30 AM Morning Post:** Minimalist Kannada/English service posters (e.g. Sump cleaning, Plumbing).
- **07:15 PM Evening Post:** Festival & Pujas, Appliance repair, Beautician offers.
- **ROI Analytics Loop:** Evaluates engagement metrics and auto-tunes content strategy!
