

Render.com 24/7 1-Click Free Cloud Deployment Guide

Follow these simple 1-click steps to deploy FixMaadi to **Render.com** so it runs 24/7 in the cloud even when your laptop is turned off!

1-Click Deployment Steps

Step 1: Push Code to GitHub

Open your terminal in `/scratch/fixmaadi-bot` and run:

```
git init
git add .
git commit -m "FixMaadi 24/7 Production Release"
git remote add origin https://github.com/YOUR_GITHUB_USERNAME/fixmaadi-bot.git
git branch -M main
git push -u origin main
```

Step 2: Connect to Render.com (100% Free)

1. Go to <https://dashboard.render.com> (Sign in with GitHub).
 2. Click **New +** -> Select **Web Service**.
 3. Connect your `fixmaadi-bot` repository.
 4. Render will automatically detect `Dockerfile` and `render.yaml` !
-

Step 3: Deployment Settings

- **Name:** `fixmaadi-bagalkot`
- **Environment:** `Docker`
- **Region:** `Singapore (Asia Pacific)` OR `Frankfurt`
- **Plan:** `Free ($0/mo)`
- **Start Command:** `node server.js`

Click **Deploy Web Service!** Render will build and launch your bot on a permanent 24/7 URL (e.g. `https://fixmaadi-bagalokt.onrender.com`).

 FixMaadi will run 24/7 continuously in the cloud!
