

FixMaadi Operations: Vendor Onboarding Playbook

Target Audience: Bhuvan Nara (Head of Field Operations, Bagalkot) & Onboarding Team.

This playbook outlines how we will build the supply side of our marketplace. In Tier 2/3 cities, service professionals (vendors) are deeply skeptical of "tech companies" taking a cut of their earnings. We must onboard them as **partners, not employees**.

1. Scouting & Sourcing

Do not rely on online ads to find professionals. They are found offline.

- **The Wholesale Hubs:** Visit the wholesale markets (e.g., electrical markets, plumbing supply streets in Old Bagalkot). Plumbers and electricians hang out here in the mornings.
- **The Competitor's Net:** Speak to security guards at large apartment complexes. They know exactly which local carpenters and maids are reliable and regularly visit the buildings.
- **The "Respect" Pitch:** When approaching a vendor, do not pitch "an app." Pitch "respect and regular income."
 - *Script:* "Anna, we want to give you guaranteed work every week so you don't have to wait for phone calls. You just do the work, we handle the customers."

2. Vetting & Verification (The Trust Layer)

Since we cannot build a multi-crore corporate training center like Urban Company, we use **Community Vetting**.

1. **Reference Checks (Mandatory):** A vendor must provide 3 phone numbers of previous local customers they have served. Bhuvan's team calls them to verify quality and punctuality.
2. **Aadhar & Address Verification:** Collect Aadhar cards and physically verify their home address in Bagalkot.

3. **The "Soft Skills" Filter:** Ensure they don't chew tobacco (gutka) on the job, carry a clean bag, and speak respectfully.

3. Onboarding & Training

[!WARNING] Keep it extremely simple. Tier 2 professionals may not be tech-savvy.

- **App Training:** Install the "FixMaadi Partner App" on their phone. Show them how to accept a job (Large Green Button) and complete a job.
- **The FixMaadi Kit:** Provide a branded T-shirt and a standardized ID card. In Tier 2 cities, a uniform commands immense respect and legitimizes their presence in middle-class homes.

4. Commission & Earnings Structure

- **Zero Upfront Fees:** Never charge them to join.
- **The First 5 Free:** Do not take any commission on their first 5 jobs. Let them taste the money and realize the platform works.
- **Standard Commission:** After 5 jobs, introduce a flat 10-15% commission (much lower than Urban Company's 20-30%).
- **Instant Payouts:** Daily settlements via UPI. *This is non-negotiable.* Gig workers in smaller cities need cash flow today, not next week.

5. Penalty & Quality Control

- If a professional is late more than twice, they are paused for 3 days.
- If a professional is caught bypassing the app (doing a side deal with a customer), they are permanently banned.
- **The Reward:** Vendors with a 4.8+ rating for the month get a ₹1,000 cash bonus.
