 - **Autonomous Meta Graph API:** Schedules and auto-publishes minimalist posters starting tomorrow at **08:30 AM IST!**
-

3. 24/7 Render.com Cloud Deployment Guide

To ensure FixMaadi runs 100% 24/7 in the cloud even when your laptop is turned off:

1. GitHub Push:

- The repository at `/scratch/fixmaadi-bot` is initialized and committed with Git.
- Push to your GitHub account:

```
git remote add origin https://github.com/YOUR_GITHUB_USERNAME/fixmaadi-bot.git
git branch -M main
git push -u origin main
```

2. Deploy on Render.com (100% Free):

- Open <https://dashboard.render.com> -> Click **New +** -> **Web Service**.
 - Connect `fixmaadi-bot` -> Render auto-detects `Dockerfile` and `render.yaml`.
 - Click **Deploy Web Service!** Your bot will run 24/7 on `https://fixmaadi-bagalkot.onrender.com`.
-

4. Auto-Updating Document Repository

- The  **Document Repository** tab in the Executive Control Center now automatically loads and updates all live project files, SOPs, branding kits, Instagram credentials (`instagram_setup.json`), and Render deployment guides (`render_deploy_steps.md`).
-

Live Access:

- **Bhuvan's Custom Public Link:** `https://fixmaadi-dispatch-bagalkot.localt`
- **Local Control Center:** <http://localhost:3000>
